

WASTE REDUCTION TIPS

REUSABLE WATER BOTTLES

TCNJ has several water stations around campus. Save money by investing in a reusable water bottle and avoid spending on expensive plastic bottles.

LESS PLASTIC BAGS

When buying groceries, try to avoid bagging items you can carry without a bag. Also, steadily building up a collection of reusable bags will help in terms of efficiency and reduced plastic waste.

THRIFT!

Thriftling is a great way to save money while also being environmentally conscious. There are about 10 thrift stores within 12 miles of Trenton, NJ.

SHORTER SHOWERS

Shorter showers are just one way to reduce the amount of water you use. Be sure to also turn off your sink when brushing your teeth, shaving, or in between washing dishes.

SUSTAINABLE TRANSPORTATION

Walking, skate boarding, and other methods of sustainable transportation help reduce carbon emissions. 20% of TCNJ's gas emissions are the result of commuting to and from campus.

WATCH YOUR MAIL

Regularly unsubscribing from unwanted mailing lists and converting to online banking and billing methods will greatly reduce the amount of paper you intake.
